Britain and It's Footstep in Life Insurance History

Modern life insurance however did not s until the British decided to try and make work. The practice of life insurance v banded in the entire continent of Euro except for England and it was exactly British that started the most prominent insurance companies known to the Europe countries today. It was in the middle of 17th century that in the streets of Lond England a group of people met together Lloyd's Coffee house and decided to co about with life insurance ideas. The cof house was a famous place for merchar ship owners and traders and therefore would be the perfect place to discuss insurance knowing that most of those peo had money.
