What is Loan or Debt?

A loan is a type of debt. Like all d instruments, a loan entails the redistribut of financial assets over time, between lender and the borrower.

In a loan, the borrower initially receives borrows an amount of money, called principal, from the lender, and is obligated pay back or repay an equal amount of mor to the lender at a later time. Typically, money is paid back in regular installments partial repayments; in an annuity, earnstallment is the same amount.

The loan is generally provided at a coreferred to as interest on the debt, who provides an incentive for the lender to engain the loan. In a legal loan, each of the obligations and restrictions is enforced contract, which can also place the borrow under additional restrictions known as locovenants. Although this article focuses monetary loans, in practice any mater object might be lent.

Acting as a provider of loans is one of the principal tasks for financial institutions. For other institutions, issuing of debt contracts such as bonds is a typical source of funding.
